

OCTOBER 2ND

Mrs. Wood's 3rd Grade

this week

- READING:

We are reading informational text. We are reading about our government and how it works.

- WRITING:

We will be writing our own informational text. This text is an expository essay. Students will choose an animal they love and write facts and details to complete their essay.

- MATH:

We have started a new module. Module 2 is about problems solving with units of measurement. We will be focusing on minutes, seconds, liters, milliliters, centimeters and inches.

- SCIENCE

We have started our science unit on the circle of life. We will be discussing animal and plant life cycles, environmental change, and reproduction of plants.

at home reminders

Please continue working on skip-counting and multiplication facts at home. These are so important for the students to know as we continue working on them at school.

Next week is believe week! I have attached our color schedule on the back of this newsletter. Each day we ask students to wear a color to support those fighting or in remission from specific cancers. Friday will be our Believe Day!
